You will need 4 more of these

Tools you will Need....

Measuring Tape

Carpenter's Square

Straight Edge (Carpenter's Square might be OK)

Box Cutter with Sharp Blade

Electric Drill and Drill Bits

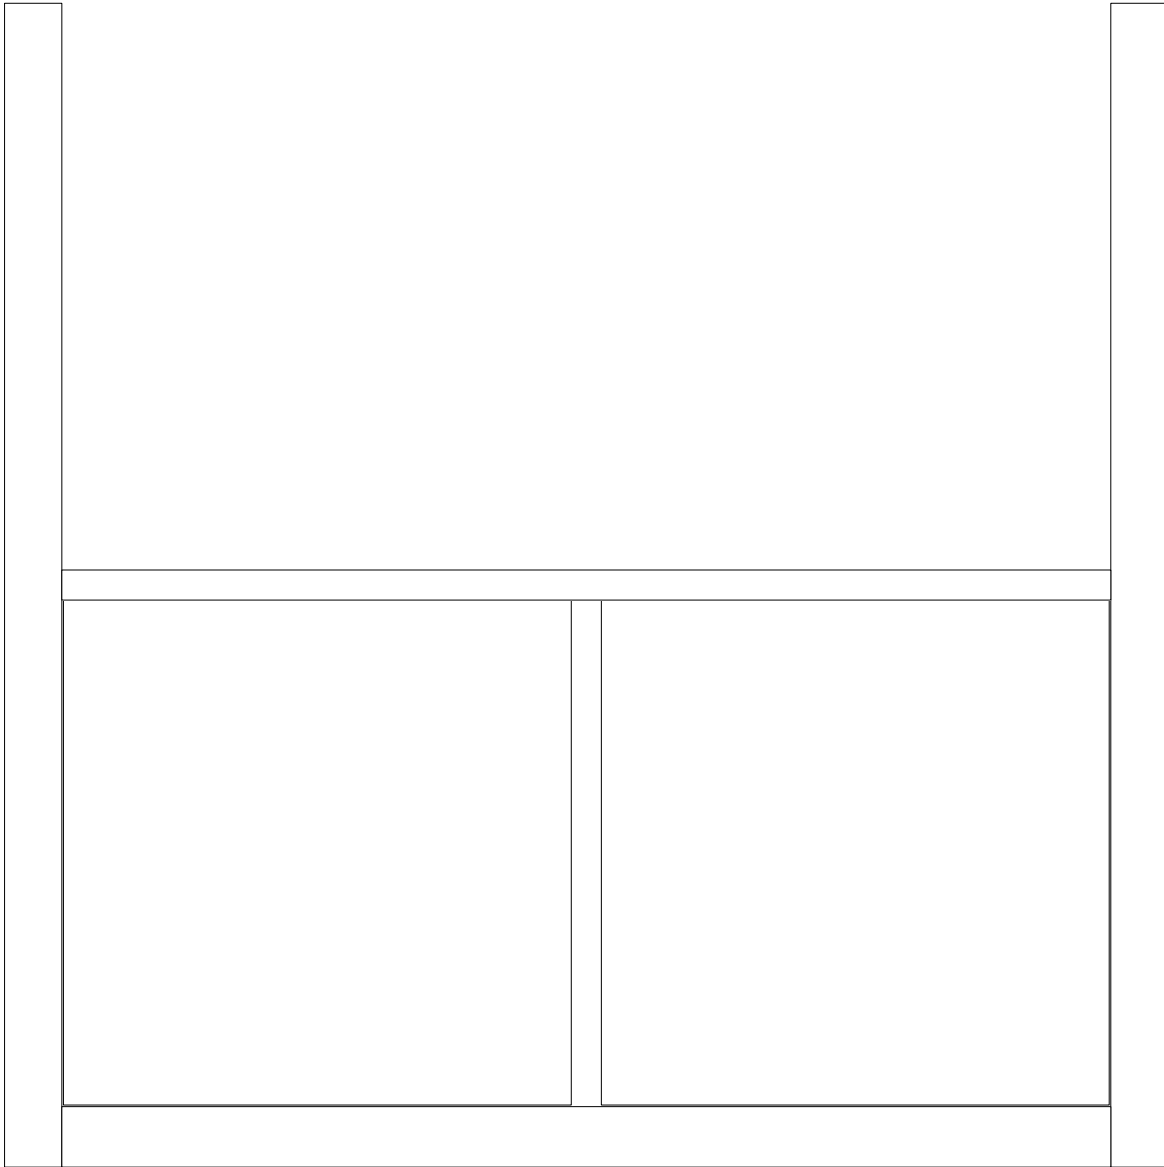

Countersink Bit

Chop Saw or Table Saw

Nice to have – Sandpaper

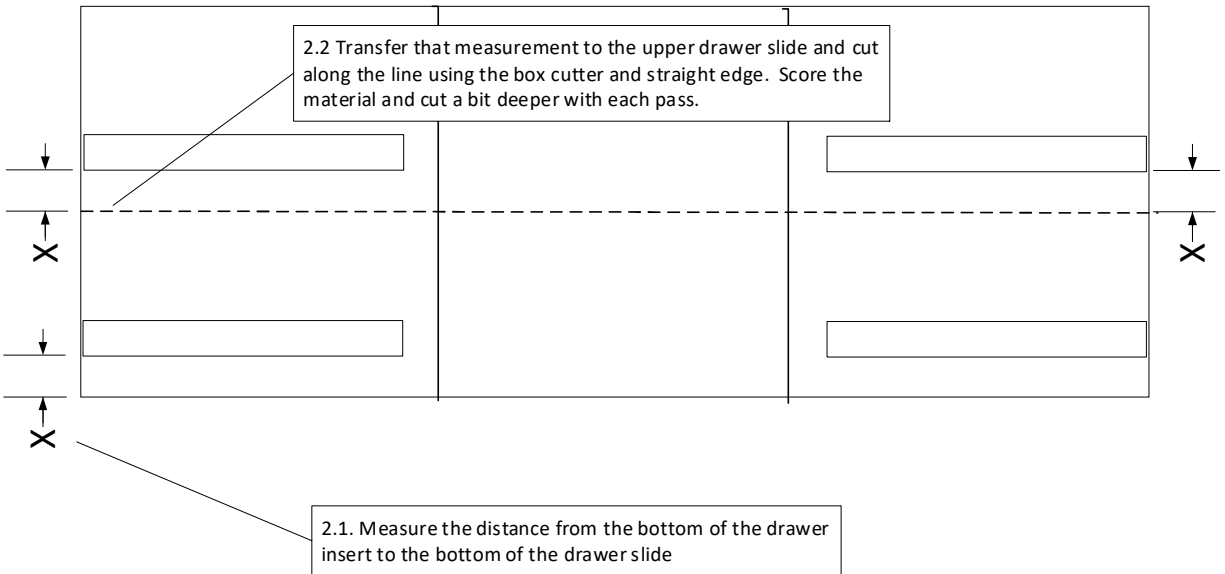

## Step 1. Partially Assemble Kallax Shelf

Start by Assembling 2 Sides and Bottom along with long horizontal divider and short vertical divider.

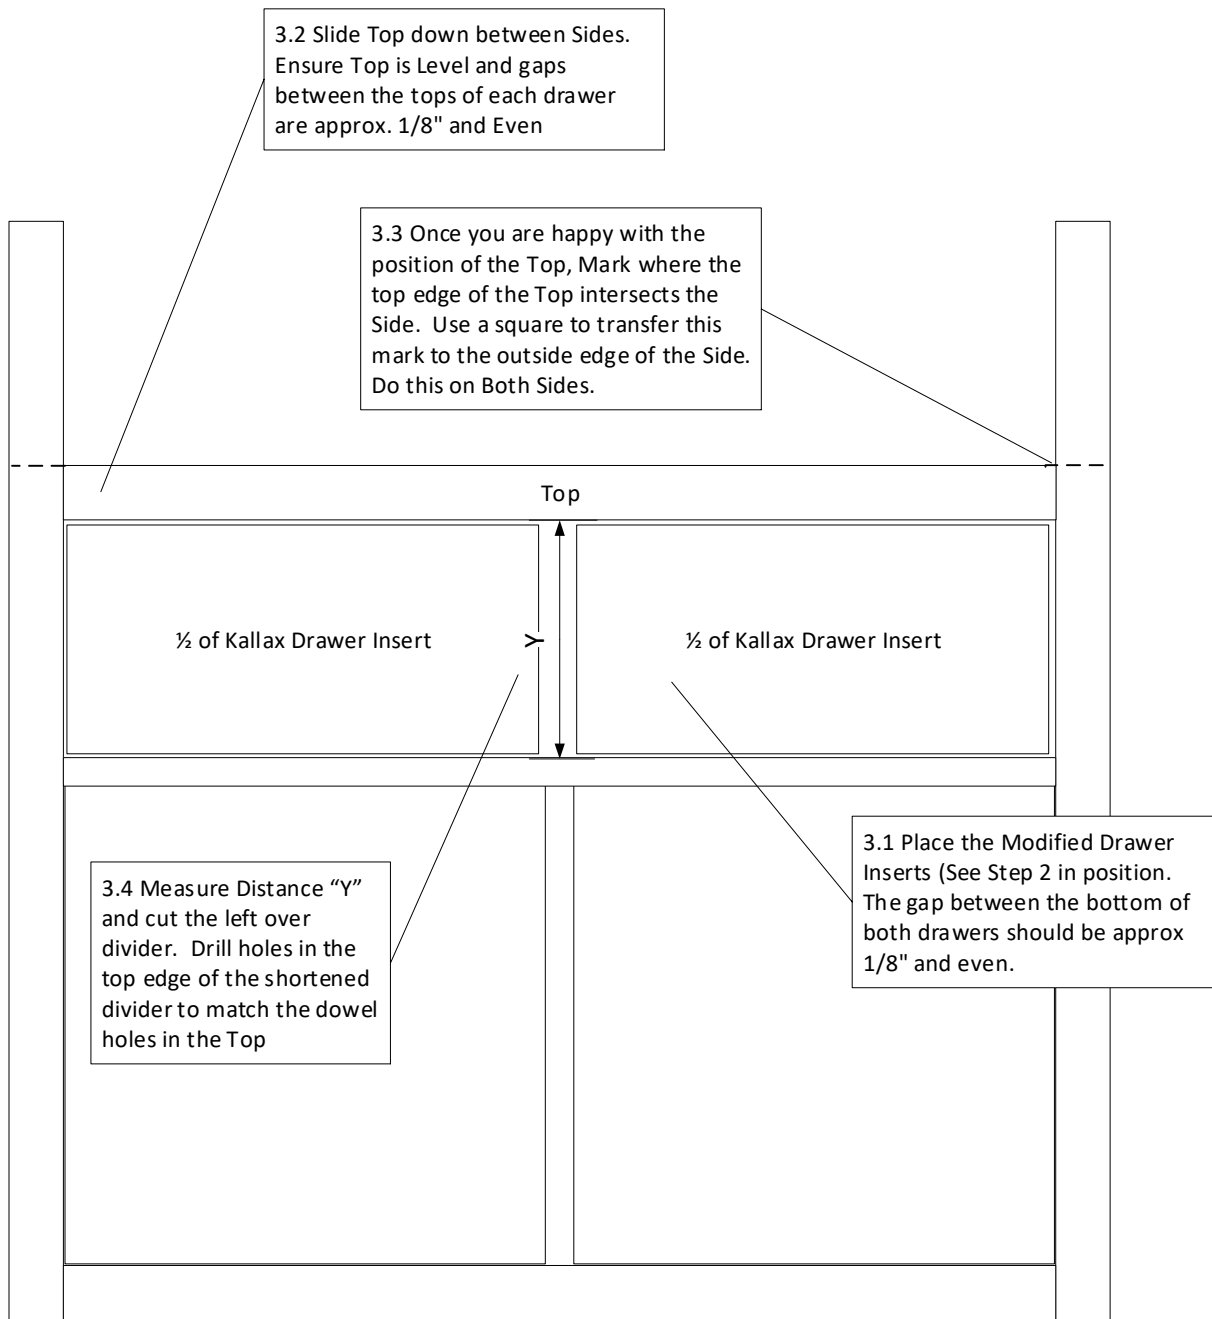

## Step 2. Modification of the Drawer Insert

The Kallax drawer insert must be cut in half as accurately as possible to provide 2 identical drawer inserts. An inaccurate job will cause assembly issues later. Use a tape measure, a carpenter's square or good straight edge and sharp box cutter. Measure twice, cut once.

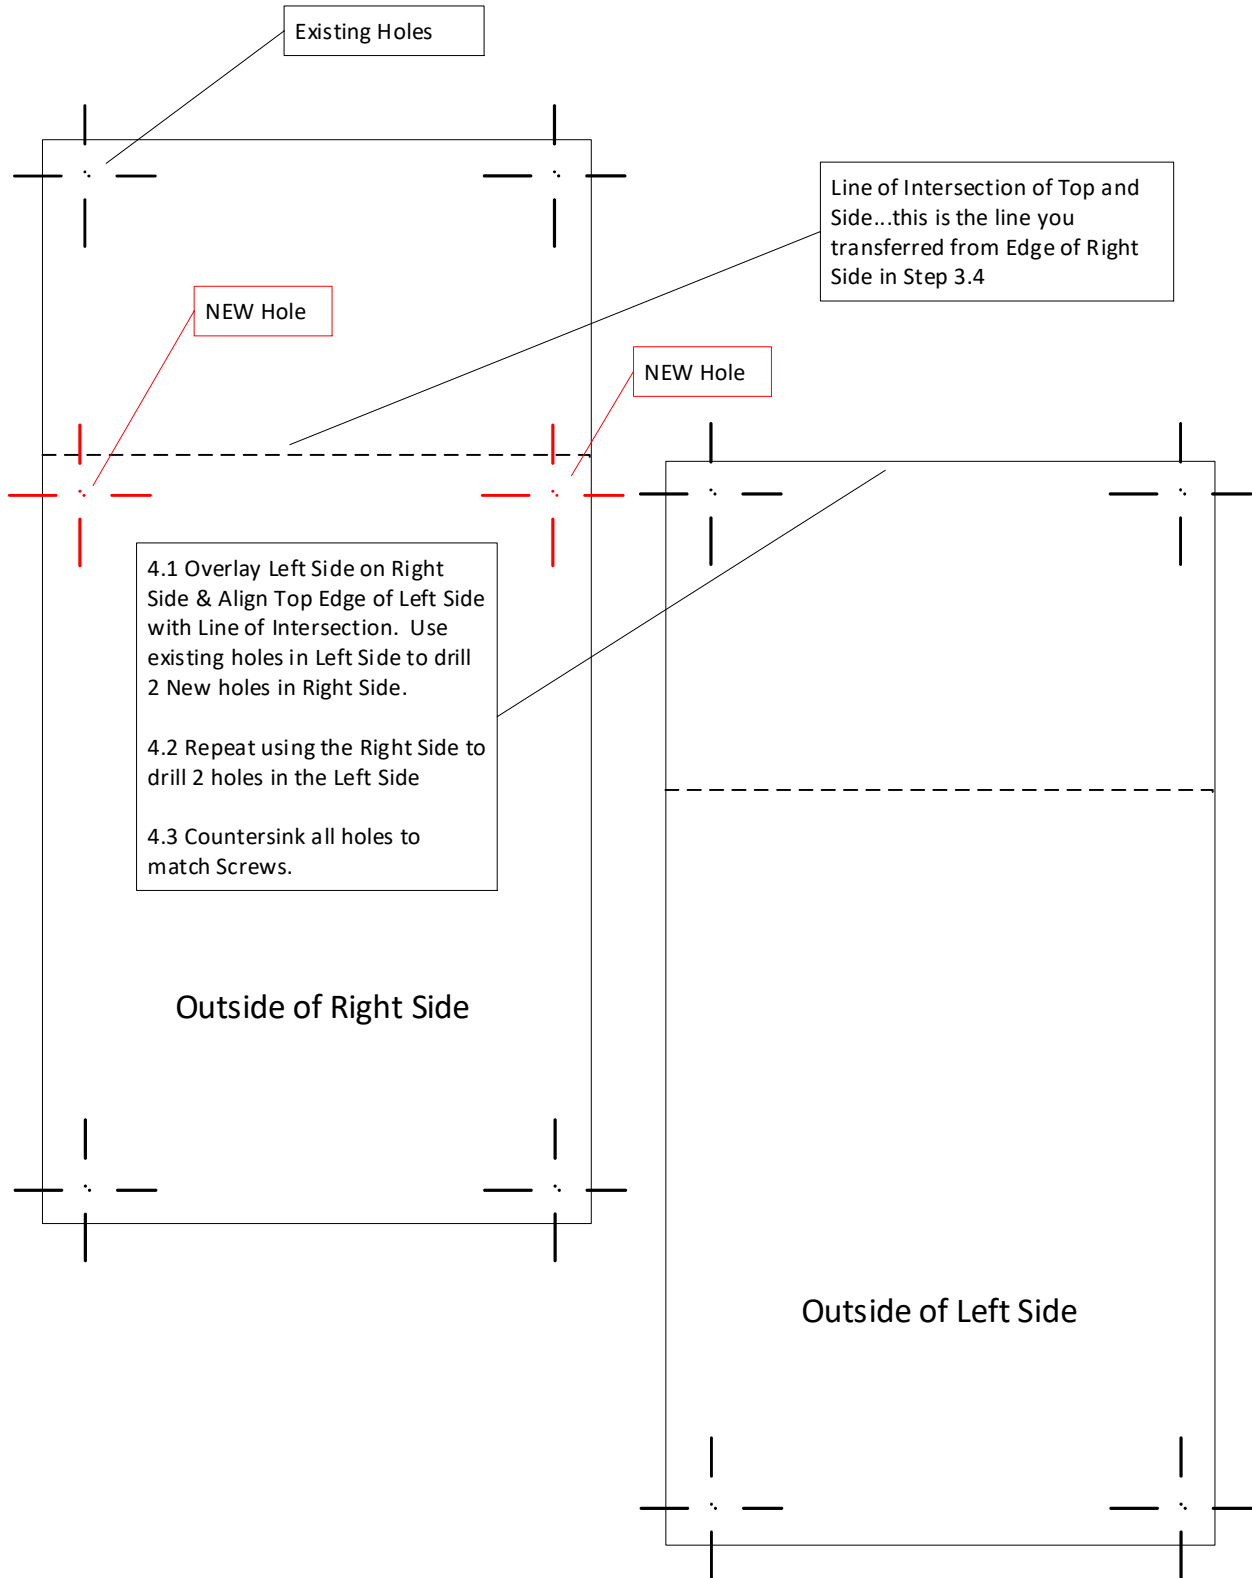

### Step 3. Temporarily Install the Modified Drawers and the Top

3.5 After completing all steps, disassemble the shelf.

## Step 4. Drill 2 New Holes in Each Side Panel

# Step 5. Final Assembly

5.1 Re-Assemble and install the drawers. Check for alignment and adjust as needed. Use the short screws provided with the Drawer Kit to fasten the inserts in place.
